Passionate software engineer with 3+ years of experience in software development. I like to explore and learn new technologies and skills to inspire innovative ideas that help make the world a better place.

Education

Bachelor of Software Engineering (Honours)
Monash University Malaysia (Sunway Campus)
Expected to graduate in 2023 November

Project Experience

Internship at The Estée Lauder Companies

Team project

November 2022 - February 2023

- I Improved beauty accessibility by creating a personalized E-commerce application that can be used by visually impaired users.
- I designed the UI and UX by addressing issues faced by visually impaired users
- I Led the team in decision-making regarding software architecture and prioritizing required features.
- I presented our solution in front of the global IT team which involved attendees from New York.
- Tools and technologies used: React-native, Supabase, Microsoft Azure computer vision service (AI image text recognition), Expressjs, and Git

Student Internship Management Project

Team project

March 2022 - November 2022

- Led the team as a release train engineer to deliver the software on a SAFe framework.
- I worked on the development of the front end of the system comprising Vue.js.
- I worked on the backend of the system which comprised of a microservice architecture Moleculerjs.

Full-stack app development

Personal Project

December 2021 - February 2022

- I created a cloned version of reddit.com
- Used MERN stack to build the app

Programming Languages

- Javascript 
- Python 
- SQL 
- JAVA 
- C 

Skills

- Using productivity apps like Trello, MS teams, google docs, and Lucidchart.
