SUMMARY

Full-Stack Developer with 3+ years of professional experience building scalable web and mobile applications using [React.js](#), [Next.js](#), [Node.js](#) and AWS. Proven ability to architect AI powered systems (Agentic RAG) and HIPAA-compliant healthcare platforms. Co-Founded and scaled a B2C/B2B marketplace from zero to 500+ users within 3 months. Recognized as top-performing intern at The Estee Lauder Companies.

SKILLS

Frontend: [React.js](#), [Next.js](#), React Native, Redux, TypeScript, JavaScript/ES6, Tailwind CSS, Bootstrap

Backend: [Node.js](#), [Express.js](#), FastAPI, Python, Celery, REST APIs tRPC, Docker, .NET

Data: PostgreSQL, MongoDB, SQL, Redis, Firebase

Cloud & DevOps: AWS (Lambda, S3, EC2), Azure (FHIR API, Cloud Vision), GCP, Git, GitHub Actions, Sentry

AI/ML: LlamaIndex, Agentic RAG, Vector Databases, LLM Integration

Practices: Agile/Scrum, HIPAA Compliance, HL7/FHIR Standards, Microservices, Serverless Architecture.

WORK EXPERIENCE

Serendip - goserendip.com

Dec. 2024 – Present

Full-Stack Developer (full-time)

Remote (United States)

- Built the Agentic RAG pipeline for [hitgirl.ai](#), improving query success rate from 50% to 90%+ and building an asynchronous document ingestion pipeline using Python Celery and Docker, supporting 100,000+ documents per organization across 3 integrated sources (Google Drive, Dropbox, Microsoft OneDrive).
- Built full-stack authentication, chat interface, and file management system for an AI-powered knowledge platform (hitgirl.ai), owning 100% of third-party integrations (Google Drive, Dropbox, OneDrive) from architecture to deployment.
- Built the backend (.NET) and redesigned the UX/UI for a community app (React Native), developing core features (gathering system, profile pages, onboarding flow) for the [BMBEA](#) community app, growing the platform from near-zero to 50+ monthly active users with 20+ new signups per month and 100+ club members.
- Delivered client-facing products for [Spelling Safari](#), an EdTech platform with 1,000+ paying subscribers.

Auth Hero - auth-hero.com

Mar. 2025 – Jan. 2026

Software Engineer (Contract)

Remote (Silicon Valley)

- Identified a critical HIPAA compliance gap in the existing backend and led the refactoring effort to Azure Healthcare Service FHIR API, integrating 25+ FHIR resources to ensure full regulatory compliance — the only engineer on the team able to implement the FHIR architecture.
- Built a multi-portal healthcare platform (Next.js, tRPC, React Native) automating workers' compensation insurance workflows for 4 user roles (clinicians, employers, insurers, patients), replacing a manual paper-based RFA process that caused patients to miss treatment due to insurance deadline violations.
- Implemented frontend audit logging for HIPAA compliance and developed the system's automated RFA deadline tracking, designed to hold insurers accountable for legally mandated approval timelines.

Petville Sdn. Bhd.

Dec. 2023 – Aug. 2024

Co-Founder (full-time)

Remote

- Co-founded a B2C/B2B pet services marketplace, growing to 500+ active users within 3 months of launch and onboarding 2 paying SME clients with 3 additional businesses in the pipeline.
- Sole developer of the B2B merchant dashboard (React.js, Recharts.js), building 5 core modules: inventory management, appointment booking, analytics with sales funnel visualization, payment gateway integration, and courier dispatch via Lalamove API.

- Designed a serverless backend using Google Cloud Functions and Node.js connected to SQL database, eliminating infrastructure costs and enabling rapid feature iteration across the platform.
- Conducted 30+ customer interviews (B2B and B2C), translating insights into a prioritized product roadmap and personally managing client onboarding and success for all merchant accounts.

GreenSHeart Sdn. Bhd

Mar. 2023 – Nov. 2023

Software Engineer

Remote

- Built a real-time patient alerting system using AWS Lambda that monitored 7 health metrics (blood pressure, oxygen saturation, weight, fluid intake, steps, medication, symptoms) from smartwatch-connected patients, automatically notifying clinicians when readings exceeded safe thresholds.
- Contributed to a remote patient monitoring dashboard for elderly care, improving UI/UX and enhancing diagnostic reporting for live clinician monitoring.
- Collaborated in a team of 4 engineers across 24 Agile sprints, delivering the completed platform on schedule and demoing to a practicing clinician for production handoff.

The Estee Lauder Companies

Nov. 2022 – Feb. 2023

Software Engineer Intern

Kuala Lumpur, Malaysia

- Led a team of 5 interns to deliver the top-ranked solution out of 3 competing teams (14 interns total), earning a private follow-up session with the ELC CTO and department head after presenting to the full New York leadership team — the only team selected for this recognition.
- Built an audio-guided E-Commerce mobile app for visually impaired users using React Native and Microsoft Azure Cloud Vision, enabling users to identify and shop Jo Malone London products by pointing their phone at any cologne, with the app reading product details aloud.
- Self-initiated team leadership across the 12-week internship, driving technical decisions and coordinating development through JIRA to deliver a polished prototype that aligned with ELC's long-term accessibility and inclusivity goals.

EDUCATION

Monash University

Oct. 2019 - Apr. 2024

Bachelor of Software Engineering (Honours)

Kuala Lumpur, Malaysia

- Graduated with Second Class Honours Division A
- CGPA: 3.4 / 4

LANGUAGES

- English (Native), Tamil (Basic), Sinhala (Basic)
